PRICE LIST—F. O. B. NEOSHO

Large Quantity Prices Quoted on Request

AUGUST, 1926

DO NOT PAY OTHER PEOPLE'S BILLS

You can buy nursery stock from an agent, a dealer or direct from the nursery. If you buy directly or indirectly from a nursery that sells on credit or even cash on delivery you will have to pay part of the losses that come with that method of selling, for such losses must be added to the selling price.

If you buy from a nursery that guarantees stock to grow, then you have to pay losses due to carelessness on the part of some planters. The chief causes of failure to grow are: exposure to drying winds or sun or to freezing temperatures when transplanting; neglect to prune tops and roots; planting in poor soil; failure to firm the soil closely about the roots; too little or too much moisture; lack of cultivation.

Our prices do not include anything for such losses.

Wherever you buy you must trust the nurseryman to send you good stock, to give you a square deal. The average buyer does not know good stock when he sees it and it is well-nigh impossible to describe. Take apple trees, for instance—experienced horticulturists agree that a first-class tree must have a good root system and sufficient growth of top for the variety and age; it must be free from injurious insects and disease; it must be true-to-name and in good condition. What are you going to take as a standard of a good root system? How tall or thick should a Winesap tree be, in a two-year old with a two-year root, or in a one-year bud with a two-year root, or in a one-year graft with a one-year root? Who can recognize varieties or vitality or injurious insects or disease?

Neosho trees bear an enviable reputation. Nurserymen and planters, large and small, compliment our stock as well-rooted, clean, true-to-name and carefully graded.

NEOSHO NURSERIES CO.

NEOSHO, MISSOURI

Peaches from Louisiana, from Neosho Nurseries Trees

'BETTER VALUES

Prices on fruit trees are usually quoted according to height only. Obviously that is a poor measure of value because the planter cuts off $\frac{1}{2}$ to $\frac{2}{3}$ of the top when transplanting.

That is why we grade and sell our fruit trees by diameter of the trunks measuring two inches above the ground. We do state the minimum heights, which includes the shorter growing varieties.

"Yours for Growing Satisfaction"

We adopted this slogan or motto to constantly remind ourselves that our prosperity depends upon the success of our customers. That motto is kept before us in every operation—propagation, digging, grading, handling, packing and shipping, also in supplying information on planning, planting and care of fruit and ornamental trees and plants.

PRICES: These prices are f. o. b. Neosho and are subject to change without notice. If they included transportation charges, the nearby customer would have to pay more than the actual cost of freight, express or parcel post to make up for the cost of shipping to more distant points.

RATES: Quantity rates apply on trees or plants of one class or kind. For instance, 25 apple or crabapple of one or more varieties entitle you to the 25 rate. 25 shrubs of one or more varieties entitle you to the 25 rate.

Please note that we do not make each, 10, 100 and 1000 rates and then print in small type, which you may not notice, that you can buy 5 trees at the 10 rate, 25 at the 100 rate and 250 (or 300 or 500) at the 1000 rate.

TERMS: We require 10% of the total amount with the order, the balance before shipment.

GUARANTEE: We guarantee your satisfaction upon arrival of your order. If you should receive any unsatisfactory stock, heel it in subject to our disposal and we will replace it free. All claims should be made immediately upon receipt of goods.

SHIPPING DATES: Nursery stock should not be dug until it is matured and dormant. This varies with season and different kinds of stock. Usually we begin shipping about October 25th and as late as May 10th. Peonies and Iris are ready September 1st.

PARCEL POST: Shipments can be forwarded by prepaid Parcel Post if customer remits 20 per cent additional to cover postage. We will refund any difference between this and the actual postage. Trees larger than $\frac{1}{8}$ to $\frac{1}{8}$ cannot be sent by mail.

INSPECTION: Our nursery stock is inspected every year by state officials and every package bears their certificate of inspection. We also comply with the regulations of other states into which we ship.

TRUE-TO-NAME: The precautions and care we take in labeling our stock correctly is the best guarantee of trueness-to-name. If, however, any tree or plant should prove untrue to name it is mutually agreed that we are not to be held liable for more than the purchase price or replacement without charge.

are Double-worked
and same price as
2 yr. apple.

TRIPLE THE LIFE OF GRIMES GOLDEN BY PLANT- ING OUR DOUBLE-WORKED TREES

Missouri State Experiment Station Bulletin No. 6 issued in 1920, says the Grimes Golden is frequently short-lived owing to the tendency of the bark on the lower part of the trunk to rot.

We know of orchards about 15 years old that are dying out because of this collar-rot. If top-worked trees had been planted, this trouble would have been avoided.

Our Double-worked Grimes Golden are propagated by inserting the Grimes bud 12 to 18 inches above the ground in a variety that is not susceptible to this disease. The roots and lower 18 inches of the trunk are two years old and the Grimes part is one-year old. They are sold at the prices of two-year apple.
